ZSCALER COMPANION FOR FEARLESS GEN AI ADOPTION

portal26 + 

RAPIDLY SCALE A RESPONSIBLE, SECURE & PRODUCTIVE GENERATIVE AI PROGRAM

**JOINT
SOLUTION
BRIEF**

*Achieve Unprecedented Generative AI
Visibility, Governance, Security, and
Analytics with Zscaler & Portal26*

Answer these critical questions with Portal26 + Zscaler

- Who is using GenAI and how are they using it throughout the enterprise?
- What data is being exposed as GenAI technologies are adopted?
- Do you have the proper governance and controls to prevent exposure, reduce risk, audit usage, and investigate GenAI incidents?
- Do you have the required knowledge to create GenAI policy, evolve your strategy, and educate your users?

1. VISIBILITY

Eliminate Shadow AI. Monitor users, usage, and prompts

portal26
zscaler™

4. INTENT

Understand user intent and GenAI productivity

2. SECURITY

Measure, and mitigate GenAI security and privacy risks

3. FORENSICS

Investigate GenAI incidents
Perform historical audit

5. EDUCATION

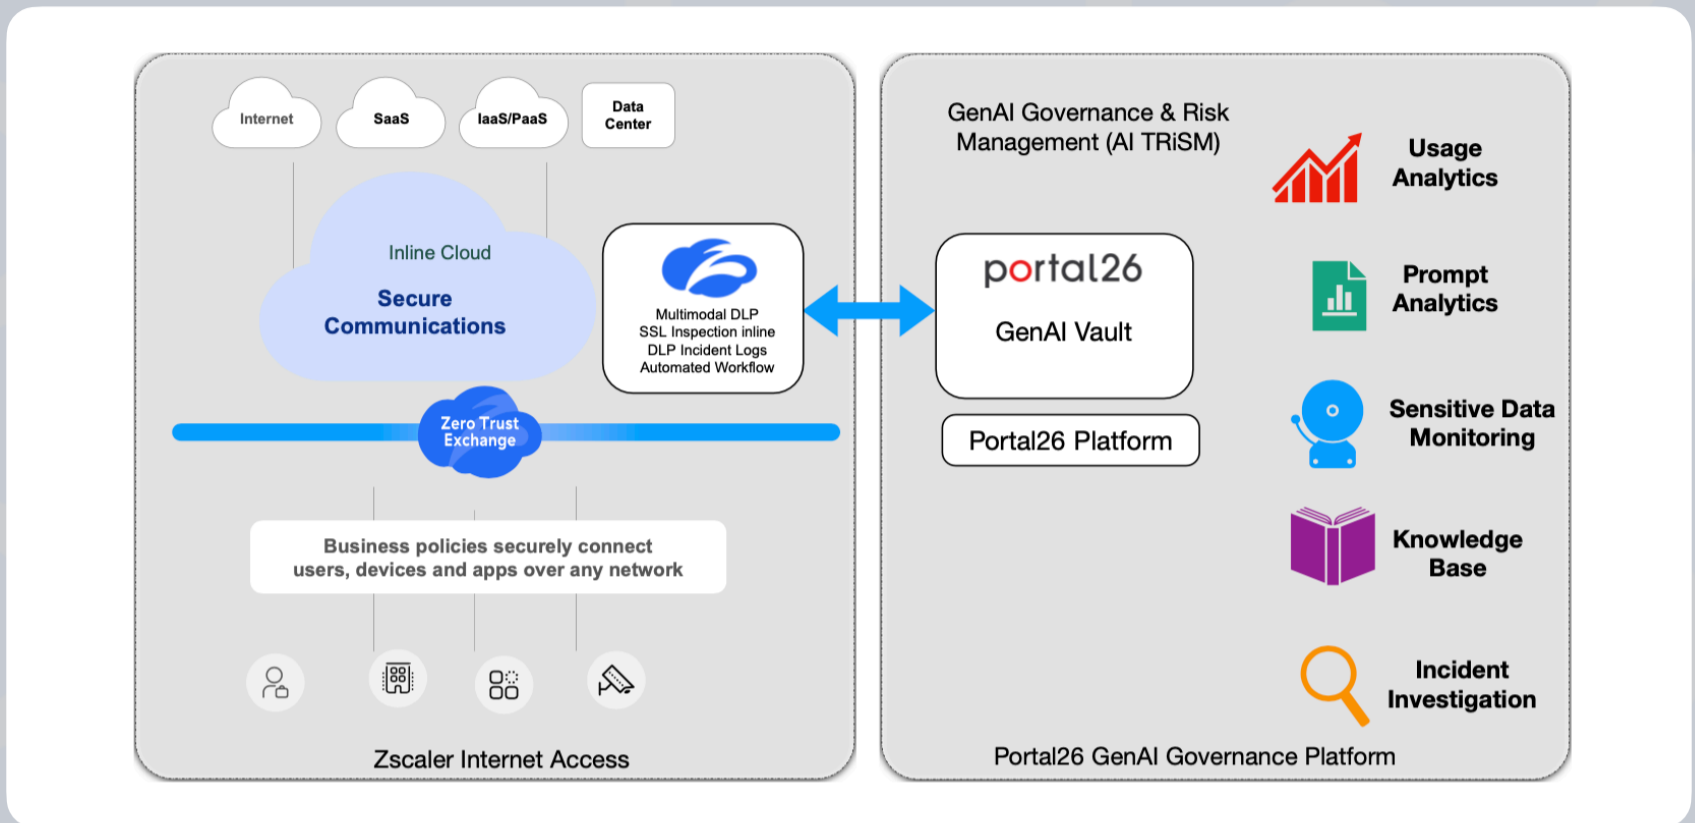

Provide GenAI education and enforce GenAI policy

Generative AI Adoption Requires a Strong Foundation

Generative AI is a once-in-a-generation shift in worker productivity that organizations are quickly taking advantage of. This is easier said than done, as the advantages of Generative AI come with a unique set of risks.

A key to all security measures is visibility and context. Visibility into usage: who is using GenAI and what are they doing with it? Very soon, you will also need to understand the risks stemming from the usage and address them. You will also be faced with GenAI breaches and GenAI compliance needs. You will need to understand usage and design policy, and education programs. Building these will take a lot of time and effort. Fortunately, as a Zscaler customer there is a simple solution. Portal26 extends your existing Zscaler investment to deliver all these needs in a matter of hours.

Rapid Set-up, Rapid Impact with Portal26 layered on Zscaler

GenAI monitoring & security

Gain full visibility down to prompts, data security, GenAI risk management, historical audit and forensics, GenAI policy distribution and attestation tracking, and GenAI education.

Usage intent, risk, & impact

Design your GenAI investments and strategies based on rich understanding of GenAI usage, prompt behavior, user intent, and productivity impact.

Board & CXO reporting

Provide board reporting on GenAI adoption, impact, and risk. Provide CXO reports on team and org usage, risks, and investments.

Deploy in days, immediate ROI

Portal26 is fully integrated with Zscaler via DLP and Incident Receiver. Portal26 can be up and running in as little as 30 minutes.

No new agent, proxy, or plugin

Deploy on top of your existing Zscaler investments. No new agents, proxies, or plugins and no change in user behavior and flows.

How Portal26 Extends your Zscaler Deployment

Portal26 builds on top of Zscaler's industry leading platform and enables fearlessly GenAI adoption by rapidly adding:

- AI-driven usage analytics with tracking and historical trending
- Prompt monitoring and analytics with prompt audit/forensics
- GenAI policy distribution and tracking
- AI-driven risk measurement and mitigation
- Strong second line of defense for GenAI DLP with real-time analysis of DLP performance
- AI-driven data exfiltration detection and forensics
- Department-level reporting for actionable insights
- Employee education triggered by AI usage, behavior patterns
- Compliance, audit, and forensics for GenAI based activity
- AI-driven prompt intelligence
- Executive reporting and dashboards

Adding GenAI Governance is as easy as 1-2-3

1 Confirm you have ZIA, DLP and ZCC rolled out

2 Configure Portal26 in the Zscaler console

3 Login to the Portal26 console to review insights

Take the next step

Portal26 transforms your Zscaler investment into a comprehensive GenAI governance and security platform. Take the next step by requesting a Portal26 Demo [here](#)
